

INTERCLEAN 2018

INNOVATION DIRECT FROM THE EUROPEAN CLEANING EXHIBITION

What is InterClean?

InterClean is an international cleaning exhibition held in May every two years in Amsterdam. Exhibitors from across the globe have a chance to demonstrate their products and many use the occasion to introduce new products and innovation. The exhibition is attended by thousands of distributors and buyers from large corporations to small cleaning companies. This year, three of the members of the Aadvark team attended and we would like to present some of the interesting things we have brought back.

New Dispensing Systems for the e:Dose concentrates range

For those of you unfamiliar with e:Dose, it is a range of 6 highly concentrated products designed to cover all areas of cleaning—Kitchen Cleaning & Degreasing (EC2), Sanitising (EC4), General Purpose (EC6), Heavy Duty (EC7) Air Freshening (EC8) and Washroom (EC9). Supplied with a dispensing cap, these products are not only very cost effective (12p per 600ml) and effective but help to reduce storage, waste, language and training issues.

Evans have now introduced a new dispensing system that can easily be fitted to the water supply and will make the diluting of the products even easier. For more information please contact us on 01329 220220 or visit evansvanodine.com

Splash-Pad

Let's face it, lots of people have a lousy aim! That makes for an unpleasant smell. Constant mopping is a chore nobody wants to do. Splash-Pad may be the solution. These carpet-like pads have antimicrobial compounds built right into the mat to eliminate the germs that cause odours. They cut down on mopping and prevent floor staining. The fibre promotes rapid air drying so maintenance free. A choice of 4 colours and various shapes. Costs only pennies per day depending on traffic.

Dissolve Tech

Every year more than 50% of companies frequently suffer problems and consequences associated with pipe blockages. Recent pieces of research have shown that the cost of solving these problems exceeds €1 billion in Europe, considering the use of chemical additives and special maintenance work. Papernet have introduced a range of products made with a temporary wet resistance; a technological solution which ensures that the tissue offers excellent performance during use and dissolves quickly on contact with water.

Bio Tech

Bio Tech is a product that uses Biological Active Tissue Paper technology. It is an innovative toilet paper containing 5 types of natural micro-organisms (harmless for people and for the environment) that, on contact with water activates to produce enzymes that feed on the incrustations and organic substances present in the pipes. These reproduce to multiply the cleaning effect and once they have completed their action, they biodegrade with no impact on the environment. Bio Tech reduces odours, clogging and blockages. In just 4 weeks, Bio Tech contributes to keeping sewerage systems, septic tanks and inspection pits clean.

Valet Battery Upright Vacuum Cleaner

This battery powered upright vacuum is lightweight and powerful. Its lithium ion battery provides 50 minutes of runtime with a 2.5 hour charge time. It has a HEPA bag included. With its convenient carry handle for easy transportation and comfortable handle grip, this vacuum cleaner weighs in at only 5kg making it ideal for transporting between cleaning jobs. This machine is ideal for day-time cleaning and where electricity points are not easily accessible. The Battery level indicator lets you know when the machine needs re-charging

Disposable Tableware

Poppies Europe have a rich history in the disposable tableware sector. They supply a wide range of disposable napkins in many styles and colours along with banqueting rolls, tablecovers, doyleys and disposable cutlery. Printed napkins are also available at a very competitive rate. Contact us for a colour selection or samples.

Aquaclean

The Aquaclean Carbon Fibre Pole from Ettore is designed to deliver the precise balance between rigidity and weight, without sacrificing durability or strength. Each pole has an aluminum outer tube that provides added strength while protecting the expensive carbon fibre inner pole. This is simple the best water fed pole available. The clamp design has positive locking tabs that won't release unintentionally. A tapered bottom clamp prevent snags and keeps the clamps separated to prevent pinch points. A durable endcap protects the end of the pole and features a side hose aperture that prevents kinks. All Aquaclean poles are supplied with a 12" brush, angle adaptor and hose. Available in 6 sizes

An Ever Expanding Range

Clover Chemicals is a manufacturer of 'Effective Cleaning Chemicals' with a range which is in excess of 150 products covering all areas of the cleaning industry including floor care, automotive, food hygiene, housekeeping and janitorial. Many of the products boast the Ecolabel that meet pass rigorous environmental fitness trials with the results verified by an independent body. Clover products are both good quality, offering high standards whilst remaining very competitive against similar brands. Please contact us for a full product brochure.

Medusa Sweeper

Industrial battery-powered sweeper for the quick, quiet and cordless cleaning of all surfaces, indoor and outdoor. The full floating main cylinder brush individually adapts to any surface, whether hard surface or carpet. Ideal for entryways of all kinds, hallways, staircases, driveways, warehouse and office areas. The Medusa is a battery-powered machine developed specifically with professional users in mind. It has a working width of 37 cm, including its two inwards-rotating side brushes. Objects with a diameter of up to 2 cm can be easily vacuumed during operation. With its light weight and compact dimensions, the Medusa is designed for hard-to-reach spaces. The side brushes enable a complete and thorough cleaning along edges and even in the smallest corners. The powerful Lithium-Ion battery (without memory effect) with 10.8 V and 1.5 Ah allows an operation time of approx. 45 minutes per battery. A second, optional battery can be directly stored and carried on the machine itself. Quick-charging unit with a charging time of only 70 minutes is included with purchase.

Biological Stain & Odour Digester

Micro Clean is a biological stain and odour digester that will effectively degrade any organic soiling absorbed into carpets, flooring and upholstery fabric, that traditional cleaners cannot remove. It is highly effective on urine stains and odours and is effective at preventing odours from small bore pipes from sinks, showers, drains and from kitchen waste units. It is biodegradable, non harmful with a pleasant fragrance.

Carbon Fibre Poles

The STREAMLINE® OVA-8 carbon fibre telescopic poles are designed in an 'oval' profile section, reducing the wear of the sections from the pole clamps. Pole stress - When designing an anti-rotational oval shaped pole, it was discovered that an additional feature was provided - stiffness. The two flat sides of the OVA-8 telescopic pole add more stability and therefore more control for the operator, a huge "safety" plus. Any experienced operative will tell you how dangerous and annoying a spinning pole section is. These flat sides will cancel out that "whipping effect" either from moving a pole at height from one window to another, or 'bouncing off the glass' motions. Operators will be more productive and work safer - both for themselves and others around them. Hand ergonomics - Holding any item in the hand for long periods can be painful. The OVA-8 design combines two flat sides. These sit more comfortably in an operator's hand and allow the tips of their fingers to sit on the flat edge. It's been found that handling an OVA-8 pole requires less grip to control the pole, either from pushing it up and down, or from firmly holding the base section to move the pole to the next window. Anti rotational pole sections - Our no.1 goal. Arriving at the final oval shape wasn't easy, as many other shapes had failed (round, square, hexagon, octagon, lobe) in one area of design or another, so designing the right shape had to provide more than one feature of anti-spin. Eliminating the rotational spin of the pole section around the clamp area results in less wear of the pole material. Also, because of the anti spin pole section, our OVA-8 oval clamps work less due to only having to prevent the pole sections from moving up or down.

Heavy Duty Nitrile Gloves

Ignite™ heavy-duty orange nitrile gloves are perfect for automotive, emergency medical, and manufacturing applications. Ignite™ gloves are extra thick at 7mil to withstand the toughest challenges of your workday. Featuring enhanced tactile sensitivity and proprietary "Max-Grip" texture technology allows you to maintain maximum finger dexterity without sacrificing protection.

SO WHAT NEXT?

If you are interested in any of the products shown here and would like further information, samples etc, please contact Aadvark on 01329 220220, email supplies@aadvark.co.uk or visit our website www.aadvark.co.uk. We would be more than happy to help.
